

## Technology Stack

|                      |                          |
|----------------------|--------------------------|
| <b>Date</b>          | 02 October 2026          |
| <b>Team ID</b>       | 6ab3ed02b5170a9b58b3aa3a |
| <b>Project Name</b>  | ComicCraft AI            |
| <b>Maximum Marks</b> | 2 Marks                  |

### Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

### Technology Stack Details

| S.No | Architecture Component / Layer | Technology Chosen       | Justification / Purpose                                              |
|------|--------------------------------|-------------------------|----------------------------------------------------------------------|
| 1    | Frontend / Client-Side         | HTML / CSS / JavaScript | Simple browser UI for entering prompts and viewing generated comics. |

|          |                                     |                     |                                                                               |
|----------|-------------------------------------|---------------------|-------------------------------------------------------------------------------|
| <b>2</b> | <b>Backend / Server-Side</b>        | Python / FastAPI    | Handles story generation, image generation, panel processing, and API routes. |
| <b>3</b> | <b>Database / Data Storage</b>      | Local file storage  | Stores generated comic panel images and project assets.                       |
| <b>4</b> | <b>Cloud / Hosting / Deployment</b> | Localhost / Uvicorn | Runs and serves the FastAPI application during development.                   |
| <b>5</b> | <b>Version Control &amp; CI/CD</b>  | Git / GitHub        | Tracks code changes and supports collaboration.                               |

|          |                                       |                                  |                                                          |
|----------|---------------------------------------|----------------------------------|----------------------------------------------------------|
|          | GitHub repository                     |                                  |                                                          |
| <b>6</b> | <b>Third-Party APIs / Other Tools</b> | Gemini API /<br>Pollinations API | Provides AI story generation and comic image generation. |
