Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Manual local API/browser verification
Type of Testing	Basic load / response-time check
Target Module / API	Comic generation request and FastAPI application
Test Environment	Localhost / Uvicorn development environment
Test Date	02 October 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Story input and page load	1	10	Application loads and accepts input
2	Generate structured comic story	1	30	Story is generated without critical error
3	Generate five comic panels	1	60	Five panel outputs are produced
4	Open and review generated comic	1	20	Panels load and remain viewable

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not measured	N/A	Formal load test not run
2	Response Time (Max)	< 5 seconds	Not measured	N/A	Formal load test not run
3	Throughput (Req/sec)		Not measured	N/A	Formal load test not run
4	Error Rate	< 1%	Not measured	N/A	No measured rate available
5	CPU Utilization	< 80%	Not measured	N/A	No measured CPU data available
6	Memory Utilization	< 80%	Not measured	N/A	No measured memory data available

Step 4: Observations & Analysis

Key Findings:

A formal performance-load test was not executed; local functional verification was used.

Bottlenecks Identified:

No bottleneck was formally measured because load-test metrics were not collected.

Optimization Steps Taken:

Kept the FastAPI flow modular and used local image/file handling; formal optimization requires measured load-test data.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

Evidence 1: Local application verification

No JMeter / Locust / k6 report was available for attachment.

Evidence 2: Performance-tool report

Not available ? formal load testing was not executed.
