Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	No
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
ComicCraft/
  app/ - FastAPI backend and application modules
    main.py, routes.py, models.py, config.py
    gemini_flash.py, gemini_pro.py
    image_generator.py, layout_builder.py
    lettering.py, exporters.py, comic_script.py
    templates/ - HTML templates
  requirements.txt - Python dependencies
  .env - API configuration
  .gitignore - Git exclusions
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://comiccraft-r3m7.onrender.com
Login Credentials (Demo)	No login required
Platform / Hosting Provider	Render
Repository Link	https://github.com/devilanand73055-dotcom/ComicCraft
Demo Video Link	https://drive.google.com/file/d/1-0NYxu8H-_ndzGAzGqhSSbf5owSrPanW/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:
Python 3.x, Git, and required API configuration.

Step 1: Clone the repository:
git clone https://github.com/devilanand73055-dotcom/ComicCraft.git

Step 2: Open the project folder:
cd ComicCraft

Step 3: Install dependencies:
pip install -r requirements.txt

Step 4: Configure the required API environment values.

Step 5: Start the application:
uvicorn app.main:app --host 127.0.0.1 --port 8000

Step 6: Open http://127.0.0.1:8000 in a browser.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI generation response time may vary.	Wait for generation to complete.
2	Internet is required for external AI services.	Use a stable connection.
3	Generated character consistency may vary.	Use clear character details.
